

NEWS OF THE MINES.

A Wyoming District Which is At Present Commanding Attention.

CINCINNATI AND GOLD, DETONATION.

Return of Mr. P. L. Schmidt and His Friends of the Wyoming District.

Mr. P. L. Schmidt, an old resident of this city and a man who is widely known, has just returned from an extensive trip to and through the state of Wyoming.

The gentleman is a mining man of the deepest dye and knows a good proportion when he sees it. To a New York reporter who stated that he had devoted a good portion of his time to an investigation of the mining and gold placer districts along the front waters of the Douglas river, located south of Laramie and just west of the Hump Mountains.

His investigations have given him the most complete information in the district and that section and his confidence has developed that something new and substantial, in fact, has been discovered in some of the formations, the things with him were very few specimens, glances at which are sufficient to convince the most casual observer that they contain great quantities of gold.

At present that particular section of country is alive with miners and prospectors, and large forces of men are engaged in the discovery of new and valuable placer districts. The work that is being done is bringing a fair return, in some cases, and it is expected in the future that the district is fast filling up with people out of employment.

Mr. Schmidt is part owner of the big mine well at Green river which has been one of the most successful and profitable in the district.

The water runs in the creek, and large quantities of gold are being taken out in preparation for the marketing of the product.

PAKES FINDINGS.

Interesting Mining News from Yellowstone.

The value in the mine of Park City, Idaho, is estimated at \$2,000,000. The mine is owned by the Park City Mining Company, which is a subsidiary of the Idaho Mining Company.

The mine is located in the Park City district, and is one of the most valuable in the state. The mine is owned by the Park City Mining Company, which is a subsidiary of the Idaho Mining Company.

COHN DRY GOODS COMPANY.

222 and 224 Main Street.

OVERWORK INDUCED - Nervous Prostration.

Complete Recovery by the Use of Ayer's Sarsaparilla.

"Some years ago, as a result of overwork, I became nervous, and unable to do any work, and was confined to my bed for several months. I took three bottles of Ayer's Sarsaparilla, and in a few days I was able to get up, and in a short time I was completely cured. I can now do any work I wish to, and I am in perfect health. I can now do any work I wish to, and I am in perfect health. I can now do any work I wish to, and I am in perfect health."

For a full and complete description of the disease, and the mode of cure, see the book "The Sarsaparilla Cure," published by J. C. Ayer & Co., Lowell, Mass.
